METERING ARRANGEMENT
To measure how much power your premises use and the electricity that the solar power system feeds to the grid

HOW A SOLAR ROOFTOP SYSTEM WORKS

WHAT MAKES TATA POWER SOLARROOF STAND OUT?

Tata Power Manufactured Bi-Facial Modules

Skilled Team for Quality Installation

Lifelong Service and Support

Comprehensive System Warranty

Comprehensive Kit Supply by Tata Power

CUSTOMER TESTIMONIAL

“I never anticipated such a huge amount of savings. Earlier, during summer, my bills were in the range of ₹10,000 - 12,000 per month and ₹6,000-8,000 per month during the cooler months. After installing Tata Power's rooftop solar, the bill has never crossed ₹1,000 and that too during peak summer. During February, it was only between ₹200 - 300. Earlier, in February, the bill used to be around ₹6,000. The professionalism and prompt service of the company have given me the assurance that I have made the right choice. Also, it is installed without compromising the aesthetics.”
